*...or, hire the professionals  
from Pipefitters Local 597*

*and get the job done ahead of schedule.*

When the Romans decided they needed an efficient delivery system to supply water to the public, they built an extensive aqueduct system. It took them 500 years to complete.

When an MCA contractor and the professional pipefitters of Local 597 installed the four new steam generators at the Braidwood Nuclear Station they completed the job in just 70 days – 8 days ahead of schedule! Figure the cost for yourself. When a project like Braidwood is completed ahead of schedule it can save the owner as much as \$500,000 a day.

Why are the piping professionals of the MCA and LU 597 more efficient than the Romans? Well, for one thing technology has changed a bit. But more than that, the pipefitters of LU 597 spend FOUR YEARS in an apprenticeship program learning the latest in technology, systems and applications. And they don't *stop* learning. As journeymen they continue their education, gaining certifications that give them even greater expertise.

The Romans had the right idea – the pipefitters of LU 597 have the right technology, tools and education.

Local 597 and their MCA contractors...

**MAKING CONNECTIONS through technology!**
